

reading test

Hold the test at approximately 35cm (14") from your face. Read the text until you have difficulty reading.

Refer to the associated number, and try on the glasses with the corresponding correction. You'll see the difference!

- +2,5** if you struggle to read this far, you're definitely presbyopic ;)
- +2** likewise, if you stop here, it's not a big deal; almost everyone becomes presbyopic with age
- +1,5** after all, you know, age doesn't mean much these days; it's all in the mind
- +1** and especially on the head, hence the importance of having stylish glasses!
- +0** at this stage, be assured, you don't need us (yet).
